BONDERITE® – Time for simplification
Universal Cleaners for machine and manual cleaning

BONDERITE® Universal Cleaners for Mechanical and Manual Cleaning

Field of application

BONDERITE® Cleaners are universally applicable:

- For industrial cleaning of workshops and buildings
- For removal of graffiti
- For window cleaning
- For steam jet cleaning
- For manual applications such as screen cleaners, vanity cleaners or brush cleaners

What are BONDERITE® Cleaners?

BONDERITE® products offer you a coordinated range of neutral, acidic and alkaline cleaners for maintenance and repair.

Why BONDERITE® Cleaners?

- BONDERITE® Cleaners are ideally suited for intermediate and final cleaning, even with difficult soiling.
- Residues such as surface coatings after machining or storage, oils, greases, metal abrasion, chips, oxides / corrosion products, ambient dirt and fingerprints are thoroughly removed.

Examples from the wide range of products:

BONDERITE® C-MC 12300 provides excellent performance in manual cleaning, at 3-10 percent concentration in floor cleaning machines and at 3-5 percent concentration in high pressure cleaners. The demulsifying property makes it easy to separate oil from the wash solution.

Advantages for you: Free of solvents, increased bath life and higher efficiency.

BONDERITE® C-MC 11110 is a universal cleaner for metal surfaces, ideal for derusting, removing lime scale from boilers or production equipment and deposits in tubs and public baths, hot water systems, etc., and cleaning chrome-plated fittings and hot-dip galvanized parts.

Advantages for you: equipment is protected during cleaning, as the base material is not significantly attacked. Easy bath control by color indicator, which automatically indicates when the bath is used up.

BONDERITE® C-SO 101 Solvent-based cold cleaner for cleaning oil-contaminated parts, tools and stationary machines (e.g. rinsing of adhesive dosing systems).

Advantages for you: Versatile use either manually, by dipping or spraying. It dries without leaving residues and has a low odor.

BONDERITE® C-MC Manuvo is a hand cleaner for particularly heavily soiled hands. The cleaner reliably dissolves oils, greases, graphite, metal and carbon abrasion, grinding dust as well as road dirt, etc.

Advantages for you: Mild liquid formulation, solvent-free and gentle to the skin due to special skin protection additives.
